SUMMARY

Pharmacist and MS candidate in Social and Administrative Pharmacy with hands-on experience in real-world evidence (RWE), pharmacoepidemiology, and market access. Skilled in NHIRD claims database analysis using SAS, NHI reimbursement dossier support, and HTA evidence synthesis.

EDUCATION

MS in Social and Administrative Pharmacy | *National Yang Ming Chiao Tung University* Feb 2025 – Jan 2027

- Conducted large-scale claims database analysis (NHIRD) utilizing SAS for pharmacoepidemiologic study
- Relevant Coursework: Pharmacoepidemiology, Clinical Research Design, Biostatistics, Analysis and Application of Healthcare Databases (SAS), Quantitative Data Analysis (R), Pharmacoeconomics

BS in Pharmacy | *Kaohsiung Medical University*

Sep 2019 – Jun 2024

INTERNSHIP EXPERIENCE

Real-World Data Scientist Intern | *Roche Product Taiwan*

Jul 2026 – Aug 2026

- Independently led three real-world evidence (RWE) projects across autoimmune and hematologic disease areas, spanning protocol design, data analysis, and results interpretation
- Generated real-world evidence with potential to support future reimbursement dossiers and inform marketing strategy, helping build an early foundation of local evidence in Taiwan
- Engaged regularly with physicians and cross-functional medical colleagues to align study design and outcome definitions with real-world clinical and strategic needs

Market Access Intern | *Sanofi Taiwan*

Jan 2025 – Dec 2025

- Built a structured database of PBRS meeting records and conducted statistical analysis using SAS, defining case characteristics as covariates to examine their association with NHI reimbursement approval timelines
- Contributed to an NHI reimbursement dossier by conducting literature reviews, synthesizing HTA results, and assisting in BIA development with epidemiological parameter estimation
- Supported a disease burden research collaboration with a public health academic team, coordinating literature reviews and consolidating epidemiological parameters to inform advocacy strategies
- Developed an interactive Power BI dashboard to visualize PBRS meeting insights, leveraging an AI model to automate the extraction and consolidation of key information from minutes
- Led the Intern CSR Project, managing its full lifecycle from planning to execution, and liaising with internal and external partners to successfully deliver two internal activities

Pharmacist Intern | *Clinical Pharmacy Department, Tri-Service General Hospital*

Jan 2024 – May 2024

- Collaborated with fellow interns to develop educational videos and pamphlets on coronary artery disease medications, with responsibilities including project planning, literature review, and materials preparation
- Recognized as the “Outstanding Intern” among a cohort of seven interns for exceptional performance

Summer Intern | *Viatrix Taiwan & TTY Biopharm*

Jul 2023 – Aug 2023

- Completed a rotational internship across key departments, gaining insights into the drug development process and the distinct roles within the pharmaceutical industry
- Developed communication skills for interacting with healthcare professionals (HCPs) and gained experience in sharing product information with physicians, as well as discussing therapeutic options

EXTRACURRICULAR ACTIVITIES

Co-founder & President | *KMU Pharmaceutical Career Research Club (KMU-PCR)*

Aug 2023 – Jul 2024

- Proactively founded the Pharmaceutical Career Research Club and developed its operational policy, serving as the central coordinator for all internal and external stakeholders
- Partnered with 5 companies and industry organizations to lead 12 projects over 9 months, each engaging 30+ participants, with responsibilities spanning project management and cross-team coordination

SKILLS

Statistical Software: SAS (Proficient), R (Familiar)

Tools: Power BI

Languages: Mandarin Chinese (Native), English (TOEIC 845/990)
